Art Unit: 2122

1. This action is in response to the amendment filed on 9/23/04.

- 2. Claims 1-2, 10, 13-14 have been amended.
- 3. Claims 1-14 have been rejected.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1 and 10 are rejected under 35 U.S.C. 102(b) as being anticipated by Pettus, (US 5,499,343)

As per amended claim 1, Pettus (US 5,499,343) discloses:

- originating a request on a first computing platform for information located on a second computing platform (Fig 15A, col 4, lines 49-59, "form implementing communication between application programs residing in client and server nodes ... server node"), where "client node" and "server node" are the "first computing platform" and "second computing platform"
- translating said request into a predetermined format readable by said second platform (col 19, lines 1-5, "a first application ... format"), where
 "converting service request into a predetermined format" clearly shows that translating the request into a predetermined format and (col 9, lines 61-67,

Art Unit: 2122

col 10, lines 1-10), where "NSF interface reformats the request and forwards it to the CSF interface" inherently including the "translating said request into a predetermined format" and (col 19, lines 1-10), where "service requests" are formatted into a predetermined format clearly shows that "requests" are translated into a predetermined format, (col 4, lines 50-60, "The CSF interface includes remote procedure call (RPC) objects for invoking and responding to service requests at the nodes, and application programming interface (API) objects for transporting those requests between the nodes. However, the API objects only provide communication transports within a node. Accordingly, the API and RPC objects interact with dynamicallyconfigurable protocol stacks within the NSF interfaces to complete the transport mechanism needed by an application program on the client node when accessing services on a remote server node"), "The CSF interface includes remote procedure call (RPC) objects for invoking and responding to service requests at the nodes" inherently including the format readable by the second platform as claimed.

transmitting the translated request to said second platform (col 14, lines 35-43), where "request/reply model objects ... data stream transactions between client and server nodes" clearly shows that transmitting the translated request to said second platform as claimed.

Application/Control Number: 10/008,831 Page 4

Art Unit: 2122

For claim 10, Pettus discloses translating requests coupled to both said first computing platform and said second computing platform is shown in (col 9, lines 61-67, col 10, lines 1-10).

For the rest of the claims, see the rejections of the previous office action mailed on 6/25/04.

Response to the argument

- 5. The applicant's argument filed on 9/27/04 have been fully considered but they are not persuasive. In the Remarks, the applicant has argued in substance:
- (1) Pettus does not disclose exchanging information between disparate computing platforms.

Response:

Pettus discloses "request/reply" model which send and receive data stream transactions between client and server (col 14, lines 35-44), which clearly shows exchanging information between disparate computing platforms as claimed.

(2) Pettus does not disclose communication between the disparate computing platforms.

Response:

Pettus discloses "request/reply" model which send and receive data stream transactions between client and server (col 14, lines 35-44), which clearly shows communication between the disparate computing platforms.

Application/Control Number: 10/008,831 Page 5

Art Unit: 2122

(3) Pettus do s not disclose or suggest "translating requests", and particularly, does not disclose "translating said request into a predetermined format readable by said second platform".

Response:

Pettus discloses "translating said request into a predetermined format" readable by said second platform" (col 19, lines 1-5, "a first application ... format"), where "converting service request into a predetermined format" clearly shows that translating the request into a predetermined format and Pettus also discloses "request/reply" model which send and receive data stream transactions between client and server (col 14, lines 35-44), which clearly shows that the requests are readable by the second platform.

Conclusion

6. THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Any inquiry concerning this communication or earlier communications from the

examiner should be directed to Chameli Das whose telephone number is 571-272-3696

The examiner can normally be reached on Monday-Friday from 7:00 A.M. to 3:30

P.M.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's

supervisor Tuan Dam can be reached at 571-272-3695. The fax number for this

group is (703) 872-9306.

An inquiry of general nature or relating to the status of this application or

proceeding should be directed to the group receptionist whose telephone number is

703-305-9600.
